Staff Software Engineer with 6+ years building creator-facing products, reporting platforms, and scalable cloud systems. Experienced in leading cross-functional initiatives spanning product, platform, and data infrastructure.

## Experience

---

### Eventbrite

*Software Engineer I/II (September 2020 – January 2023)*

*Senior Software Engineer (January 2023 – April 2025)*

*Staff Software Engineer (April 2025 – Present)*

- Defined and executed a platform modernization strategy to scale timed-entry event capacity, reducing architectural constraints across multiple services responsible for event lifecycle, ticketing, and attendee management
- Created a shared event selector platform adopted by multiple engineering teams, supporting timed-entry and standard events while reducing duplicate development effort and improving consistency across creator-facing experiences
- Built an event search platform for creator-facing web pages, expanding filtering capabilities while improving query performance by 50%
- Led migration of 10 creator report pages from legacy infrastructure to modern architecture, improving page load times by 60%, eliminating export generation failures, and establishing the foundation for future reporting development
- Led modernization of reporting ETL infrastructure, reducing annual operating costs by approximately \$500,000 while simplifying long-term maintenance
- Migrated critical event creation and update functionality from legacy system to modernized architecture, decreasing page loads by 30% and decreasing request latency by 80%
- Managed allocation of a \$75,000 annual budget for Eventbrite's Black employee resource group, funding professional development, community programming, and member initiatives
- Co-facilitated Eventbrite's frontend guild, a biweekly meeting to educate and inform engineers at Eventbrite, by sourcing demos and new findings from other engineers within the company
- Mentored engineers across multiple teams through recurring career-development and technical-guidance sessions, supporting promotion readiness and professional growth

### Lost Our Box

*Project Lead: Bullet Barrage Basketball (July 2025 – April 2026)*

*Unity Developer (September 2019 – Present)*

- Led a 20-person cross-functional team through development and release of the action sports platformer game, "Bullet Barrage Basketball"
- Coordinated development across art, music, design, and engineering disciplines while contributing game and systems programming
- Facilitated weekly meetings to track work and ensure steady progress across monthly milestones
- Showcased ongoing games at various conventions throughout Texas to gain feedback on game feel and implementation

## Education

---

## Schools

**Berklee College of Music:** Music composition for Film, TV, and Video Games

**Lambda School:** Full Stack Web Development

## Certifications

Oracle Certified Professional: Java SE 11 Developer (2021)

Developing Serverless Solutions on AWS (2021)

Architecting on AWS (2021)

## Skills

**Languages:** TypeScript, Java, Kotlin, Python, C#, SQL

**Frontend:** React, NextJS, HTML, CSS, JavaScript

**Backend:** Spring, Express.js, Django, Flask

**AWS:** Lambda, S3, API Gateway, CodeBuild, CodePipeline, Redshift, Aurora, DynamoDB, SNS/SQS, CloudWatch, AWS CDK

**Cloud and Infrastructure:** Terraform, Docker

**Game Development:** Unity, Unreal Engine, Godot
